

**ULTRAFLEX GP** Digital Imaging Plate  
**ULTRAFLEX HR** Digital Imaging Plate  
**ULTRAFLEX XB** Digital Imaging Plate

### **New!** Better Resolution IP

- Film Replacement Quality
- Custom Shapes & Chemistries Available
- Designed Specifically for NDT applications

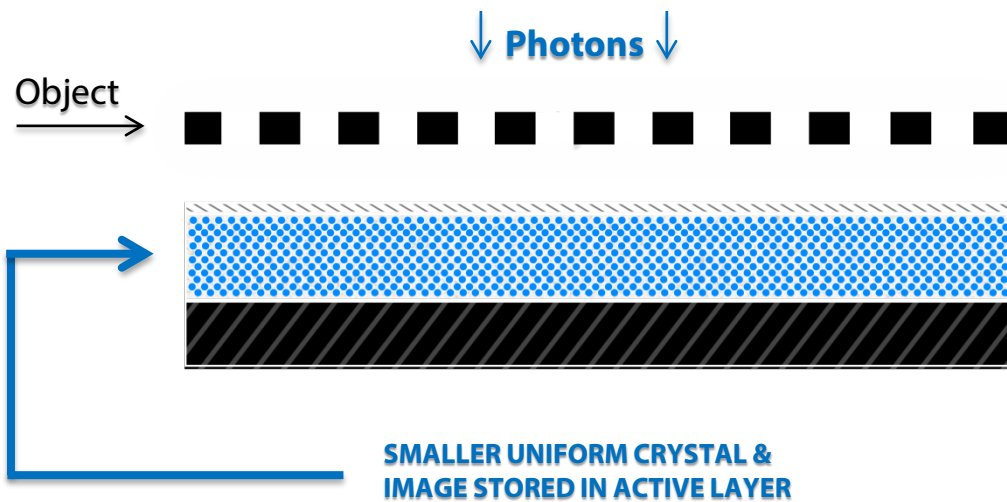

**AEROSPACE • AUTOMOTIVE • OIL & GAS • MILITARY APPLICATIONS**

### **ULTRAFLEX Imaging Plates :**

- Flexible** | Extremely flexible design allows the plates to wrap around most industry objects.
- Resolution** | Better resolution and a suitable replacement for many applications.
- Variety of Sizes** | Covers a wide range of applications and custom sizes available.
- Versatile** | Used in rigid or flexible cassettes that come with magnetic backing.
- Efficient** | Phosphor plates can be easily erased and reused thousands of times.
- Tough** | Designed for rough environments required for most applications.

## Focus on Resolution & Image Quality

Smaller Crystals = Higher Resolution  
Better Chemistry = Enhanced IP

### Recommended Uses:

**ULTRAFLEX Imaging Plates** are available in many sizes, and are designed for a wide variety of CR NDT applications, including:

- **Field Radiography**
- **Erosion and Corrosion**
- **Pipeline Inspection**
- **Welded Fabrication**
- **Aerospace**
- **Military Applications**

### Optimized for :

- **SIGNALX** Cobalt CR Solution
- **SIGNALX** C-60 CR Solution
- **SIGNALX** IR-192 CR Solution
- **SIGNALX** Onyx CR Solution

MADE IN THE USA
