

OMETTO EQUIPMENTS FOR RADIOPROTECTION AND INSPECTION

COMPANY

Welcome to Ometto Equipments for Radioprotection and Inspection.

A leading business in sales of equipments for radioprotection, industrial radiography, and non-destructive testing. Synonymous with excellence, innovation and quality.

We work throughout national territory, striving to offer the best products and services to the most diverse branches of business, including industrial, medical, nuclear fields and research.

EXCLUSIVE DEALER FOR

RUA CAMPO SALLES, 1818 - SALA 2
BAIRRO VILA BOYES
PIRACICABA - SP CEP: 13416-310

SPECIALIZED TRAINING

We aim for excellence in learning, and our faculty comprises of Masters, Physicists, Engineers and Radioprotection Supervisors, acting in the most diverse fields and bringing real day-to-day experiences to the course, thus guaranteeing a differentiated training.

Among the offered courses are:

- Training for Radioprotection Supervisors;
- Technician in Industrial Radioprotection;
- Lecture and Recycling Courses for Radioprotection

LEADER IN SALES
OF RADIOPROTECTION
EQUIPMENTS

☼ RADIOPROTECTION

Radiation detectors, digital dosimeters, dose integrators, area monitors, Bluetooth systems with real-time parameters and software to monitor Alfa, Beta and Gamma radiations, X-rays and neutron levels.

☼ RADIOPROTECTION EQUIPMENTS

All the most modern and updated equipments and accessories for radioprotection and monitoring of ionizing radiation, designated for industries, medical field, research, nuclear power plants, national security, harbors and airports.

☼ RADIOPROTECTION COUNSELING

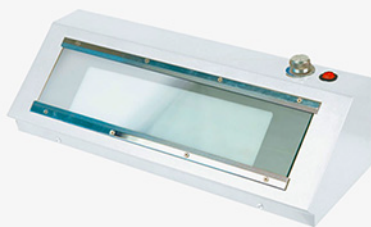

Ometto Equipments offers full counseling services in radioprotection, including: auditing in radioprotection services, licensing of radioactive installations, radiation protection protocols, radiation level reports, wipe test, transportation of radioactive materials, import/export of radioactive materials, and radioprotection training.

We work with a team of Masters, Physicists, Engineers, and Radioprotection Supervisors qualified by the National Committee of Nuclear Energy (Comissão Nacional de Energia Nuclear - CNEN) in the fields of industrial radiography, nuclear meter, radioactive markers, particle accelerator, well profiling, and nuclear medicine.

INDUSTRIAL RADIOGRAPHY

A complete line of equipments and accessories for gammagraphy and industrial X-rays, including dark-room supplies, radiographic film, processing chemicals and radiographic exposure accessories.

....

NON-DESTRUCTIVE TESTING

Equipments and accessories for ultrasound, positive material identification (PMI), spot test, magnetic particle testing and liquid penetrant testing.

The background is a solid dark blue color. It features several white line-art motifs: a technical drawing of a mechanical part in the top left, a chemical structure of a branched alkane in the top right, a chemical structure of a fused ring system in the bottom left, and a geometric diagram with a circle and intersecting lines in the bottom right.
